

MUNIQUIP, LLC

Your Source For Water & Wastewater Equipment

Southern California & Southern Nevada

Product Line Card

October 2019 Update

WHO WE ARE

MuniQuip, LLC is the premier manufacturer's representative sales & service organization focused on mechanical rotating machinery, mechanical & biological process equipment, and instrumentation equipment for the municipal & industrial water/wastewater markets of California and Nevada. Our vision here at MuniQuip is to continue being a market leading provider of the highest quality products, solutions, and services to our clients through integrity, hard work, dedication to our craft, and the desire for continued growth.

OUR MARKETS/REGIONS

Northern California & Northern Nevada (**NORTHERN REGION**) is defined as all counties north of and including INYO, TULARE, KINGS, & MONTEREY Counties in the State of California and all counties except CLARK county in the State of Nevada. This Northern Region is covered by our teams out of Roseville & Fresno, CA.

Southern California & Southern Nevada (SOUTHERN REGION) is defined as all counties south of and including SAN LUIS OBISPO, KERN, & SAN BERNADINO Counties in the State of California and CLARK county in the State of Nevada. The Southern Region is covered by our teams out of Ventura & San Diego, CA.

OUR TEAM

Dave Giersch
President
dave@muniquipllc.com

Don Reppond
Senior Sales Engineer
donr@muniquipllc.com

Taylor Hansell
Project Manager
thansell@muniquipllc.com

Rich Giersch
Service Manager &
Aftermarket Sales
richardg@muniquipllc.com

Kevin Hall
Sales Engineer
khall@muniquipllc.com

Elise Delk, CPA
Chief Financial Officer
edelk@muniquipllc.com

Butch Gorshing, P.E.
Sales & Engineering
dbgorshing@muniquipllc.com

Luke Breshears
Sales Engineer
luke@muniquipllc.com

Fei Gao
Accounting Manager
fei@muniquipllc.com

Travis Murdoch
Sales Engineer, SoCal
travis@muniquipllc.com

Rich Love
Sales Engineer, SoCal

PUMPING EQUIPMENT

GRUNDFOS SUBMERSIBLE SEWAGE PUMPS –

Grundfos SE & SL heavy duty line of premium submersible or dry-pit mounted solids handling wastewater pumps, SuperVortex or S-Tube impeller for world class hydraulic efficiency and maximum solids passage, IE3 premium efficient motors, self-contained closed-loop motor cooling, complete package lift stations & controls in various configurations

GRUNDFOS DOSING - DDA SMART digital dosing chemical metering pumps, mechanically & hydraulically actuated chemical metering pumps, DID digital skid mounted analyzers, reagent free chlorine analyzers, complete tank mounted, or skid mounted chemical metering pump systems & accessories

GRUNDFOS BOOSTER PUMPS & BOOSTERPAQ -

Grundfos CR vertical multi-stage booster pumps up to 150HP, BoosterpaQ complete variable speed booster pump skid systems, NSF 61 certified

GRUNDFOS MIXERS & FLOWMAKERS – premium line of submersible mixers in direct-driven or gear-driven configurations with options for stainless steel or polyamide propellers, gear-driven flowmakers

GRUNDFOS SUBMERSIBLE WELL PUMPS –

premium line of submersible well pumps available in a wide range of materials including SS featuring state-of-the-art hydraulic design combined with energy-efficient motors, monitoring and controls are available for constating system optimization

MORRIS – 6100 series severe duty grit pumps featuring cup-type recessed impeller design & Hi-Chrome iron construction, 7100 series large heavy duty dry-pit mounted solids handling pumps with capacities up to 140,000 USGPM

PACO – Complete premium line of end-suction centrifugal, split-case, & inline centrifugal pumps, close-coupled & frame-mounted configurations, NSF 61 certified

SEWER CHEWER – Twin-shafted heavy-duty grinders offered in various mounting configurations for in-line, in-channel, or submersible wet-well applications

YEOMANS-CHICAGO – Heavy-duty large dry-pit solids handling wastewater pumps, offered in various materials of construction & mounting configurations, closed-loop cooling systems

CRANE PUMPS & SYSTEMS

BARNES – SITHE submersible chopper pumps from 3HP to 60HP in standard or explosion proof rated versions, Blade submersible grinder pumps from 2HP to 15HP, SH series premium submersible solids handling wastewater pumps including the SITHE submersible chopper pump, sump pumps & dewatering pumps, self-priming pumps, fiberglass package pumps stations & controls in various configurations, EcoTran residential low-pressure sewer package grinder pump stations

USEMCO – Fully customizable engineered factory-built package pumping stations for water and wastewater applications, package water pressure boosting stations, UL 508 panel shop for custom control panel packages including SCADA systems, custom pump house buildings and enclosures

PROCESS & INSTRUMENTATION EQUIPMENT

AERATION INDUSTRIES – Municipal & Industrial fixed and floating non-splashing surface aerators, Triton® series floating aerator/mixer for superior mixing & oxygen transfer, anti-fouling aspirator aerator, aerator rental program for emergency or temporary aeration

ANDRITZ SEPARATION – Sludge dewatering equipment including centrifuge decanters & centrifuge sludge thickeners, belt filter press & gravity belt thickeners, sludge dewatering screw press, belt filter press, disc filters, belt/drum/fluid bed dryers, contact & paddle dryers, heavy-duty fine & course screening equipment

CLOACINA – Package Wastewater Treatment Systems, modular design systems, Stage-1 package system for 0-2000 GPD treatment with integral pump station in a compact footprint, Industrial Batch Reactor (IBR) system for 1000-10,000 GPD treatment utilizing Activated Sludge and Gravity Clarification in a single vessel, MEMPAC systems for 1000-500,000 GPD treatment are fully customizable Membrane Bio Reactors (MBR) designed to treat high-strength Industrial waste or Municipal waste, fully automated SCADA systems and retro-fit options for clients looking to optimize existing systems

CONTEGRA – Heavy-duty non-metallic submersible pressure transducers for liquid level measurement in either PVC, PVDF, or Viton materials of construction, gauge pressure transducers, ultrasonic level transmitters, 316 SS mechanical float switches, touchscreen pump station controllers for 2, 3, or 4 pump operation

DELTA DRIVES – Full line of variable frequency drives from 1/4HP – 840HP, 6-pulse & 18-pulse drives with built in PLC's, options for passive or active harmonic filters, built-in MODBUS & I/O expansion capabilities for all drives, compact version Micro-Drives, low/medium/high voltage

E & I Corporation
Division of McNish Corporation

E & I Corporation – Catenary bar screens, catenary trash racks, EIMT chain & multi-rake bar screens, traveling water screens, ARC screens, grit collectors, flocculators, NSF-61 Certified three and four shaft rectangular sludge collectors, pipe & helical skimmers, passive water intake screens

ENAQUA – Innovative non-contact UV disinfection systems for both in-channel or in-pipe applications, Enaqua AFP™ tubes allow high transmissivity of UVC while remaining very resistant to scaling & fouling, Enaqua's low pressure high output (LPHO) lamps are equipped with Smart Lamp Technology for individual lamp monitoring, complete monitoring & control systems that allow flow & level pacing operation & control, Third Party Validated technology with CA TITLE 22 certification

GREYLINE – Worldwide leader in ultrasonic instrumentation for water & wastewater treatment systems, clamp-on ultrasonic flowmeters including transit time flowmeters for clean fluids & doppler flowmeters for sludge, slurries, grit, & raw sewage applications, open channel & partially filled pipe flowmeters, area-velocity flowmeters, permanently installed or portable versions available for all flowmeter options, ultrasonic level devices for liquid level measurement

KROFTA - Leading manufacturer of Dissolved Air Flootation (DAF) Systems, Air Dissolving Tube (ADT) air saturation technology, Supracell DAF: high output & low retention time in a compact circular footprint, Multifloat DAF: modular rectangular configuration with a vertical or horizontal design, Sandfloat DAF: flocculation, dissolved air flotation and multi-media filtration in one solution, full DAF automation systems, full rental fleet available

MAHR MASCHINENBAU – World leaders in multi-raking screen technology, the MM2MM® Multi-Rake Bar Screen with bar spacing down to 2mm, individually replaceable bars & bar spacings that can be changed after screen installation, stainless steel construction, precision waterjet cut screen parts to reduce heat induced stress during manufacturing, Perscalator™ through flow fine screen, Jet Breaker™ washer compactor, & screenings conveyance systems

ORENCO COMPOSITES – Leaders in fiberglass composites manufacturing including buildings & shelters, basins & wet wells, rectangular tanks, custom buildings, enclosures, & custom products

OR-TEC – Screening & Headworks equipment featuring: Screw Screen Compactor, Rotary Brush & Rake Screens, The Blue Whale Micro Bar Screen w/ screen openings down to 1mm, LO-FLO screen, Constant Current Screen & Grit System, Vortex Grit & Classifier System, Septage Receiving Systems, Wash Compactors, Screw Augers, Sludge Dewatering equipment featuring: Belt Filter Press, Belt Thickeners, and the Rocker® Screw Press

PARK PROCESS - Container filters for solids dewatering: self-dumping, front loader & roll-off sizes, booster pump packages, sewer pump station packages, precast concrete products, oil/water separators, rainwater harvest systems, manual bar screening systems

PULSAR – Ultrasonic level measurement & flow monitoring devices, industry best 3-degree beam angle and auto mapping for the most accurate ultrasonic device on the market, compact units, various controllers for a wide array of applications

REBUILD-IT SERVICES GROUP – EIMCO & Dorr-Oliver OEM parts & services, New & replacement EIMCO-RSG clarifiers & thickeners, RSG premium skimmers, launder covers, drive rebuilds for most major drive manufacturers

ROBUSCHI - Positive displacement blowers, highly efficient screw blowers, sound proof enclosure packages, ROBOX integrated package systems with fully automated controls, ROBOX Energy: permanent magnet motor driven positive displacement screw blower package systems that provide the highest efficiencies of any positive displacement blower system on the market

RODNEY HUNT – Cast iron slide & sluice gates, cast iron flap gates, fabricated stainless-steel slide & sluice gates, weir gates, aluminum gates, composite gates, roller gates, radial gates, Pelican® & Bascule® gates (crest gates), stop logs

SPX LIGHTNIN – Water and Wastewater mixing solutions in various configurations, fixed mount mixers, side entry mixers, extended shaft mixers, inline mixers, various impeller designs including a patented Clean Edge Impeller for the toughest mixing applications

TANK CONNECTION – Storage containment tanks including bolted steel RTP storage tanks, field-welded storage tanks, shop-welded storage tanks, and hybrid storage tank designs. The bolted RTP tanks feature a gasket-less design, options for either an NSF 61 Certified LIQ Fusion FBE™ fusion bonded epoxy coating or the AQUA AGT 2020™ glass/porcelain enamel coating system, field tank erection services for either bolted or welded tanks

MUNIQUIP, LLC

Your Source For Water & Wastewater Equipment

MuniQuip, LLC is dedicated to serving our customers and supplying the very best solutions for your water and wastewater needs. If you have any questions or would like more information about the products we represent, need new equipment, replacements, retrofits, parts or service, please don't hesitate to contact us. We are here to help!
